

Project Demo Planning

SKILL WALLET — A SmartBridge Product

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

Demo Responsibilities Matrix

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Present the business context, problem statement, objectives, and the systemic challenges of manual credit risk assessments.	2 mins	Member 1 (Lead)
2	Data & Preprocessing	Explain dataset attributes, missing data management, feature encoding, and handling class imbalances using SMOTE.	3 mins	Member 2
3	Model Architecture	Discuss the machine learning algorithms trained (XGBoost, Random Forest), hyperparameter tuning, and cross-validation strategies.	3 mins	Member 3
4	Live Platform Demo	Demonstrate the interactive web application interface by inputting sample application details to trigger real-time predictions.	4 mins	Member 1 & 4
5	Performance Metrics	Showcase the performance metrics dashboard focusing on the Confusion Matrix, ROC-AUC score, Precision, and Recall optimization.	2 mins	Member 4
6	Conclusion & QA	Address queries from the evaluation board, summarize key takeaways, and discuss potential future scalability.	3 mins	All Members

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Highlight how automated credit scoring minimizes financial risk and human bias in high-volume lending institutions.
2	Solution Overview	Walk through the end-to-end data pipeline from raw financial records ingestion to deploying an optimized model endpoint.
3	Live Feature Demonstration	Perform live test runs using both a low-risk applicant profile (Expected: Approved) and a high-risk applicant profile (Expected: Rejected).
4	Q&A Session	Be prepared to justify feature selection choices, handling data skewness parameters, and deployment environment latency.
