

Problem-Solution Fit Canvas

SKILL WALLET — A SmartBridge Product

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS]		6. CUSTOMER LIMITATIONS [CL]	5. AVAILABLE SOLUTIONS [AS]
- Retail banking risk managers and credit underwriters. - Financial institutions processing high-volume card applications. - Applicants seeking fast, unbiased credit evaluations.		Budget: High infrastructure overhead for legacy scoring software. Devices: Limited to desktop internal intranet frameworks.	- Manual credit check reviews (High accuracy, very slow/costly). - Traditional FICO rules engines (Fast, but fails on thin-file credit history applicants).
		9. PROBLEM ROOT CAUSE [RC]	7. BEHAVIOR + INTENSITY [BE]
		- Manual underwriting methods depend on fragmented legacy spreadsheets. - Lack of automated class imbalance tools to evaluate rare high-risk default applicants accurately.	Behavior: Bank officers spend hours examining applicant paperwork. Intensity: Extremely high during promotional periods, leading to backlogs.
2. PROBLEMS/PAINS + FREQ [PR]		10. YOUR SOLUTION [SL]	8. CHANNELS OF BEHAVIOR [CH]
- Long turnaround delays for customer application feedback loop. - Human processing errors leading to higher credit default rates. Frequency: Constant daily operation bottleneck.		Credit Card Approval Prediction System: - An automated ML pipeline utilizing SMOTE and XGBoost classifiers. - Provides real-time validation via a fast web app, minimizing approval bottlenecks.	Online: Internal institutional web portals, automated cloud databases, API server configurations. Offline: Branch office application paperwork collection and physical applicant verification checks.
3. TRIGGERS TO ACT [TR]			
- Surging credit application volumes straining current operation staff. - Rising financial default rates highlighting rules-engine blind spots.			
4. EMOTIONS BEFORE / AFTER [EM]			
Before: Underwriters feel overwhelmed by infinite paperwork backlogs; customers experience high anxiety waiting days for status choices. After: Underwriters gain high confidence using objective automated data risk scores; customers feel satisfied with instant transaction responses.
