

Code-Layout, Readability and Reusability

Date	4 July 2026
Team ID	XXXXXX
Project Name	Credit card approval
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	yes	Proper indentation used throughout the code.
2	Proper File Structure	Files and folders are logically organized	yes	Project files are organized into folders (dataset, model, app, etc.).
3	Meaningful Variable Names	Variables reflect their purpose clearly	yes	Variables are named clearly (e.g., age, income, credit_score).
4	Function / Method Names	Functions are descriptively named	yes	Functions have descriptive names (e.g., train_model(), predict_approval()).
5	Code Comments	Inline and block comments explain logic	yes	Basic comments added to explain important sections.
6	Modular Design	Code is split into reusable functions/modules	yes	Code is divided into reusable functions/modules.
7	No Redundant Code	Duplicate or unused code is removed	yes	Duplicate code removed and functions reused.
8	Error Handling	Exceptions and errors are handled gracefully	yes	Basic input validation and exception handling implemented.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	data preprocessing module	Python(pandas)	Data cleaning and preprocessing	high

2	Model training module	Python (scikit-learn)	Training the ml model	high
3	Prediction module	Python	Predicting credit card approval	high
4	User input module	Streamlit/python	Taking user input	medium
5				

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized project with proper file structure and modular design. Readability
Readability	5	Code is easy to read with meaningful variable and function names.
Reusability	5	Functions and modules can be reused in similar machine learning projects.
Documentation / Comments	4	Basic comments and documentation are provided for better understanding.
Overall Score	5	Good quality code with proper structure, readability, and reusability.
