

No. of Functional Features Included in the Solution

Date	4 july 2026
Team ID	XXXXXX
Project Name	Credit card approval
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User input	Accepts applicant details	Input module	Done	1
2	Data preprocessing	Cleans and preprocesses input data	Preprocessing module	done	1
3	Model training	Trains the machine learning model	ML model	done	1
4	Credit card prediction	Displays the prediction result to the user	Prediction module	done	1
5	Result display	Validates user input and handles	Output module	done	1
6	Error handling	Loads dataset for training/testing	Validation module	done	1
7	Data loading	Interactive interface using Streamlit	Data module	done	1
8	User interface		Ui module	done	1

Feature Summary:

Metric	Count / Value
Total Features Planned	7
Total Features Implemented	7
Core / Must-Have Features	5

Additional / Nice-to-Have Features	2
Features Tested & Verified	7

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Responsive HTML web form for entering applicant credit details (e.g., income, history). Dashboard view displaying clear prediction status (Approved/Rejected).
2	Backend / Logic	2	Flask server routing for processing incoming web requests. Machine Learning model inference pipeline using Python to predict eligibility.
3	Database / Storage	1	Local storage logs or structured dataset management for tracking submission history.
4	API / Integration	1	REST API backend endpoints (/predict) connecting the web interface to the ML engine.
5	Security / Authentication	1	Server-side input validation to prevent invalid, empty, or anomalous numeric submissions
